

RM3-S1-4X03K-F0

Product Overview

The 3G-SDI dual channel optical fiber transmitter perfectly converts 2 SDI electrical signals at SMPTE 424M, SMPTE 292M, SMPTE 259M and DVB-ASI to optical signal. This high density design allows designers more flexibility on the product size. It supports data rate 3Gbps and handles pathological patterns. The package is pluggable SFP. Paired with PALCONN 3G-SDI optical fiber receiver, it will transmit signals with maximum distance up to 10km, 40km or 80km over single mode fiber.

PALCONN 3G-SDI Optical Fiber module complies with FCC, TUV, and UL standards. It is also Pb-free and RoHS compliant.

Features

- Support 2-channel SMPTE 424M, SMPTE 292M, SMPTE 259M, DVB-ASI
